Wassim Soltani

Senior software engineer | Ariana, Tunisia, working remotely

hello@wsoltani.com | wsoltani.com | linkedin.com/in/wsoltani | github.com/wSoltani

7 years of full-stack work across web applications, backends, browser extensions, desktop apps and AI features, including leading a development team. Takes ideas from the first decision to the day people start using them.

Professional Experience

Senior software engineer, Vantage Labs — Apr 2022 - Present

Contract role through Blueblood, fully remote, on Vantage's AI writing and learning products

WriteAhead AI feedback on students' essays, in a browser extension and a web app

- Proposed building the extension around Chrome's Side Panel, which became the shape of the product
- Chose to move the extension to WXT and rewrote it, including live-streamed feedback
- Rebuilt the web app on Next.js
- Delivered modules end to end on Spring Boot and PostgreSQL, including organisation admin
- Integrated feedback into Google Docs, Word for the web, IntelliWriter and MyAccess
- Implemented the Keycloak sign-in shared with IntelliWriter, another Vantage writing product

React, WXT, Next.js, TanStack Query, Tailwind CSS, Spring Boot, PostgreSQL, Keycloak, Vitest, Playwright

ZebraPay An import extension for ZebraPay

- Designed and built the import system, which automates data entry
- Built the extension that pulls data from partner sites, and the DevTools panel where each site is set up
- Wrote the Node service that runs OCR on images with AWS Bedrock and returns structured data

TypeScript, React, Plasmo, Zustand, Node.js, Express, AWS Bedrock

CorrectEnglish Vantage's writing assistant, mostly for job seekers and people writing English as a second language

- Shipped Gmail support first, then Indeed, LinkedIn and other sites
- Kept suggestion underlines and cards in place on any page, isolated in Shadow DOM
- Maintained and fixed the native Android (Kotlin) and iOS (Swift) keyboards

React, Redux Toolkit, Tailwind CSS, Webpack, Shadow DOM, Jest, Puppeteer, Kotlin, Swift

Founder, Blueblood — Apr 2022 - Present

Own company, used for the Vantage Labs contract and its own clients

- Onboarded and worked with interns on other Blueblood projects: one for 6 months, two for 3

Blueblood Store Online shop and back office for Hachanicom, a phone and electronics retailer in Tunisia

- Developed and maintained it solo, in production from 2024 to 2026
- Built an SSR Angular storefront and a JHipster back office with promotions, an audit log and restorable backups
- Added semantic search, similar-product recommendations and AI-written product descriptions on Workers AI and Vectorize
- Automated the entry of phone specs and clean product images with a GSM Arena import, since doing it by hand was too slow for staff
- Configured and ran the servers and the shop's own mail server

Angular SSR, JHipster, Spring Boot, PostgreSQL, Elasticsearch, Docker, Traefik, Cloudflare Workers, Workers AI, Vectorize

Freelance developer — Jun 2025 - Sep 2025

Void AI shopping assistant for online stores, through Upwork

- Proposed moving it from its planned AWS stack to Cloudflare, and the proposal was accepted
- Engineered the MVP engine, with product ingestion through a vision model, bge-m3 embeddings in Vectorize, semantic search and streaming RAG chat
- Built the admin app and specced the API gateway, guiding the junior developer who implemented it

TypeScript, Cloudflare Workers, Hono, Workers AI, Vectorize, D1, React, Zustand, Tailwind CSS

Lead full-stack developer, AlmavivA — Sep 2019 - Mar 2022

- Became one of the development unit's two leads as Visa Services expanded to Egypt and Russia
- Introduced to AlmavivA Italia as the developer in charge, and represented the team in calls and meetings on security and technology
- Pushed management to grow the team, and recommended hires
- Onboarded and guided three developers, and helped the data scientists when needed
- Deployed and ran the apps on OVH servers

Visa Services AlmavivA's visa platform, a public website and CRM in one

- Pitched rebuilding it and won approval with a proof of concept
- Rebuilt it full stack with one other developer, plus an Ionic app, then took over the frontend as the work split
- Implemented MasterCard payments for Egypt end to end, and the i18n
- Rolled out in Tunisia, Egypt and Russia, and adopted as the group's visa tool
- Wrote the platform's documentation (setup, API, workflows) and the security documents AlmavivA Italia asked for

Spring Boot, Angular, Ionic, REST APIs, MySQL, OVH

Qualis Analytics AI quality scoring of call center recordings, before the LLM boom

- Developed the analytics frontend and an audio player with a synced, clickable transcript
- Wrote Java packages used across the microservices

Angular, Spring Boot, Java, Microservices, MongoDB

Video archive Archive and playback for the City of Rome's livestreamed council sessions, built for PerVoice

- Built it full stack with one other developer, on Spring Boot and Thymeleaf

Projects

Netherstone Desktop app — Public beta since Oct 2026

A desktop app for Markdown documents and drawings, with a rich editor, links between documents and a built-in browser

Free and open source (GPL-3.0) | Windows, macOS, Linux | Tauri, Rust, React, SQLite, Git

Syncify Spicetify extension — Released May 2026

Backs up what you installed from Spicetify Marketplace and restores it in one click after a Spotify update or on a new computer

6,100+ people, 77,000+ items backed up | Open-source extension (MIT)

TypeScript, React, Cloudflare Workers, D1, R2, KV, Workers AI

Yapora Windows app — Public beta since Sep 2026

Turns any image into an avatar that reacts to your voice, live in OBS or rendered to a video

Rust, Tauri, TypeScript, React, Zustand, Mediabunny

Lyrica Private app — In use since Oct 2026

Times every word of a song's lyrics with machine learning, on a local GPU

Python, PyTorch, wav2vec2, TypeScript, React, Hono, Cloudflare Workers

Nethermark npm packages — Released Oct 2026

A small Markdown source editor for the web, built on CodeMirror 6 and published on npm

MIT | TypeScript, CodeMirror 6, React

Older projects at **wsoltani.com/archive**

Education

Master's degree in computer science Tek-Up University — 2019 - 2022

Software engineering and information systems

Bachelor's degree in computer science applied to business management Université Libre de Tunis (ULT) — 2016 - 2019

Skills

Programming
TypeScript, JavaScript, Java, Python, Rust, Kotlin, Swift

Backend
Node.js, Spring Boot, JHipster, Hono, REST APIs, Keycloak, OAuth2

AI
AWS Bedrock, Workers AI, Vectorize, PyTorch, LLMs, embeddings, RAG

Writing
Technical writing and documentation

Frontend
React, Next.js, Astro, Angular, Redux, Zustand, HTML, CSS, Tailwind CSS

Desktop and mobile
Tauri, Ionic mobile apps, native Android and iOS keyboards

Data
PostgreSQL, MySQL, MongoDB, Elasticsearch, SQL, NoSQL

Extensions
WXT, Plasmo, Webpack, Shadow DOM, DevTools panels

Cloud
Cloudflare Workers, Durable Objects, D1, R2, KV, AWS, Docker, Linux servers

Automated testing and CI/CD
Vitest, Testing Library, Playwright, Jest, Puppeteer, GitHub Actions

Languages

English Native or bilingual | **Arabic** Native or bilingual | **French** Fluent (DELF B2)
